Nova (12V) Machine

A double-insulated machine for the farmer & shearer

The single-speed, double-insulated Lister Nova lets you shear safely and with absolute confidence. The ultra-low starting current makes the Nova ideal for use with portable generators, and it features a lightweight, durable casing. Nova (12V) has been designed specifically for use with a vehicle battery, providing total assurance where mains electricity is not available.

- Single speed
- Double insulated for safety
- Low starting current
- Lightweight robust casing
- Standard rope-pull on/off switch
- Designed and manufactured in the UK

The Nova operates through a 1.8m flexible drive, and is not available with a solid drive.

Nova Machine (12V / Flexible Drive with Handpiece): NUF-HDXZB

Nova Machine (12V / Flexible Drive less Handpiece): NUF-HDXXX
