

Outback

A double bearing shearing handpiece for reliable durability

Outback is a robust, double bearing handpiece for durability and consistent results. Ideal for the professional shearer and farmer alike, the contoured body with moulded grip allows for more controlled and comfortable shearing.

- Double Bearing technology for a smooth cut
- Intelligent design with a low profile fork and prongs to reduce drag
- Increased movement within the back joint for an agile first blow
- Low maintenance
- Slim-line balanced and contoured body for comfort over long periods
- Moulded grip for increased control
- Designed and manufactured in the UK

Specification Type	Product
